

GOLD MODULE: COLLABORATION AND HIGH PERFORMANCE TEAMS

OBJECTIVE

To apply the Gyronix System in a team environment to create joint and collaborative working project maps generated for team best practice, activity implementation and review. This methodology enables clarity on issues, improved communication, consensus, collaboration and commitment to individual and collective activities. With only one version of a project plan, the team have immediate access to the latest updates, resulting in greater team productivity and savings in time, resources and money. This ultimately maximises the time the team spend getting work done and minimises administrative and planning/updating functions.
